

Figure 1: Correlation of the time needed to adapt the hR3 cells to each protein concentration.

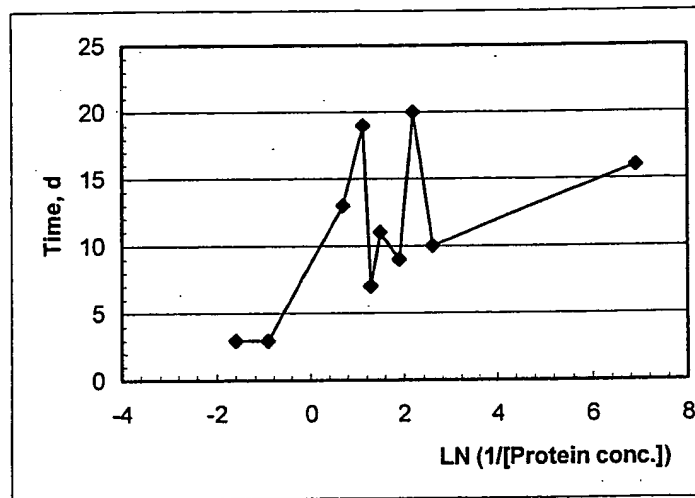

Figure 2: Correlation of the total time from the start of adaptation procedure for the h-R3 cell line.

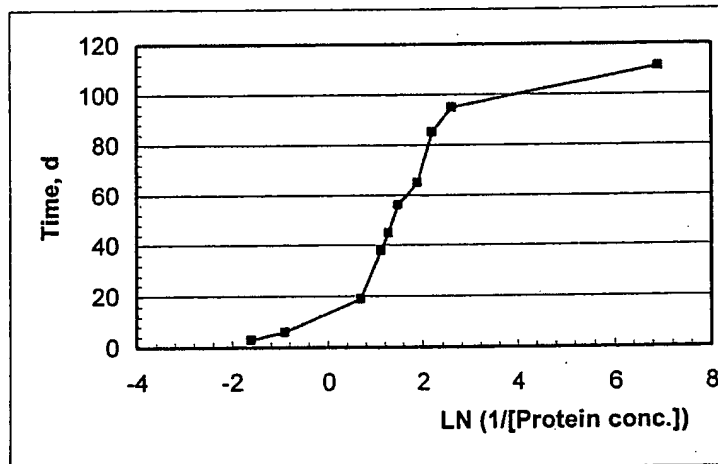

Figure 3: Correlation of the time needed to adapt the T1hT cells to each protein concentration.

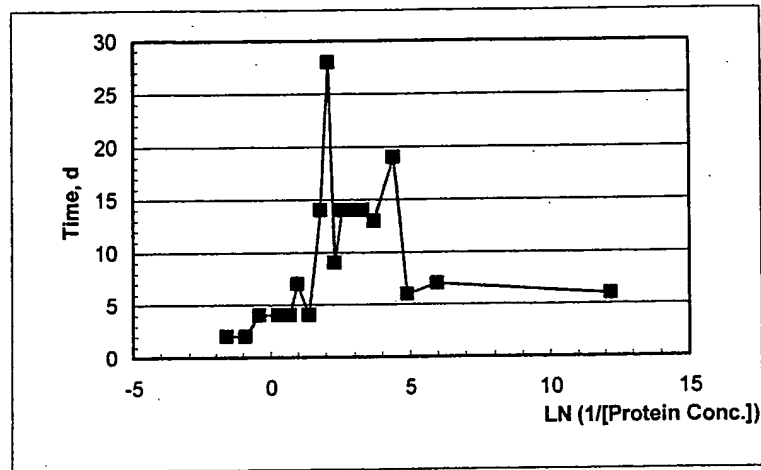

Figure 4: Correlation of the total time from the start of adaptation procedure for the T1hT cell line.

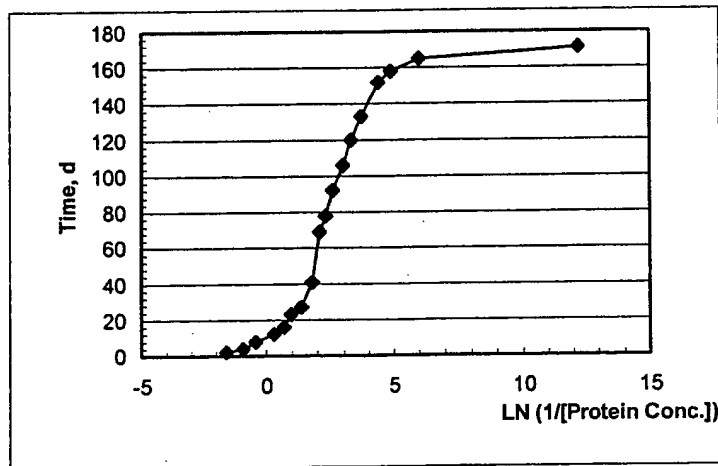

Figure 5: Correlation of the time needed to adapt the T3Q cells to each protein concentration.

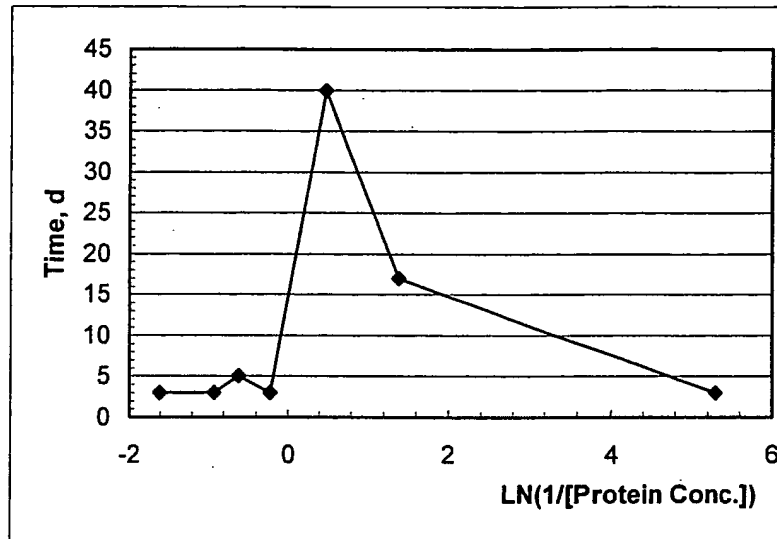

Figure 6: Correlation of the total time from the start of adaptation procedure for the T3Q cell line.
